The Molebridge Practice welcomes IMH Group to the partnership

**Molebridge Practice is delighted to announce that it has two new executive partners, securing the future of the practice for the patients, staff and the community.**

With Dr Williams and Dr Florido leaving the practice, the addition of the two new partners allows The Molebridge Practice to continue providing care to our patients. We have also secured support services from IMH Group, who have a proven track record of supporting practices and helping them deliver primary care in a safe and effective manner. The main Partner under IMH will be Dr David Jones.

IMH Group is a network of primary care sites across the UK whose aim is to help the NHS to deliver its 5-year plan. They are a clinically led group of over 40 sites, including GP Practices, Walk-In Centres, and Urgent Care Centres.

Primary care in the UK continues to face major challenges, however with the support of the CCG, NHS England and IMH Group, we believe the new partnership and the practice is in a strong position to adapt to the future needs of its patients.

**We would like to take this opportunity to thank you for your patience and support during this transitional period.**

What to expect as a patient:

- You are still a patient of The Molebridge Practice – the name of the practice won't change
- Both sites will remain open with their current hours
- The appointment system has already been changed to enable more patients to get an appointment when they need one
- The care that you receive won't be affected by the new partnership, although there may be some changes in the way we deliver it
- Dr Hedi Hanson is a qualified GP who is now permanently working at the practice 5 days a week
- We also have a long term locum GP Dr Youssef Youssef who has provided excellent support for the last few months
- We are also looking at alternative clinicians that will improve your access to services such as specialist Nurses and Pharmacists who can prescribe
